multiview®
FINANCIAL SOFTWARE

Stop chasing numbers.
Start using them.™

When it comes to the health of people, finance teams can make as big a difference in the big picture as any other hospital department. We believe their tools should be just as sophisticated, and this is why Multiview leverages **90+ statistical datapoints** from your EMR.

Multiview Healthcare Features

With an abundance of features designed with the healthcare industry's unique challenges in mind, our ERP solution will save your accounting and finance teams countless hours. You can say goodbye to month-end while opening the doors to robust reporting and valuable business insights.

At Multiview, we take a personalized approach to implementation and training. We bring industry-specific expertise to the table, calling on our team of former Hospital CFOs, Business Office Directors and Revenue Cycle staff to offer you customized guidance. Here's an overview of the core features you can tap into and the unique benefits our solution offers.

Alerts and Follow Ups

Ease of follow up items i.e. cash balances, vouchers on hold.

Daily push alerts for reconciliation exceptions.

No manual lists to maintain.

Electronic Bank Reconciliations

Reduction at month-end for bank reconciliations – daily automated check clearing.

Effective cash management.

Accurate bank account management.

EMR 360 Patient Level Revenue

Drill back to source interface data – no need to log into EMR.

Use Multiview reporting tools on operational interfaced data.

Multiview ERP gives healthcare finance departments access to real-time, actionable data that users control. By pulling from multiple sources into a single point of truth, we help you make more informed decisions when and where they're needed, so you can drive better results across your entire organization.

multiview®
FINANCIAL SOFTWARE

multiview®
FINANCIAL SOFTWARE

Supporting **200+ Health Systems** in over 42 states – with over 4,000 beds and counting.

Gain Visibility With Integrated Forecasting

Budgeting and forecasting activities do not require any additional infrastructure thanks to our fully-integrated solution. Audited change management and full drill back functionality allow you to instantly navigate from a report back to the source data in question—no need to log into your EMR, just enjoy a seamless workflow.

Data in your EMR and Multiview will reconcile each day to ensure consistency. If the system identifies an exception, it will push it to accounting for review. No matter how many data sources you have, Multiview can aggregate and normalize it to make sure it's fully accessible for reporting purposes.

EFT, ACH, PositivePay

Paperless processing.

Assists with Fraud protection.

Decrease overhead expenses (management of discounts).

Auto-Reconciliation

Multiview & EMR data auto-reconciled daily.

Exceptions identified with push alerts to accounting.

Resource Savings With Paperless Processing

Our ERP solution means reduced overhead expenses. With paperless processing, your entire team will benefit from a streamlined workflow. Approvals can be handled electronically with the ability to attach any documents within the system and you can prepare accruals at the push of a button.

Multiview also has built-in fraud detection tools to protect your practice. Plus, you'll benefit from realized discounts thanks to faster vendor payments. All that and audits become easier than ever because there is no need to pull papers out of filing cabinets. Everything you need is easily accessible, traceable and sharable.
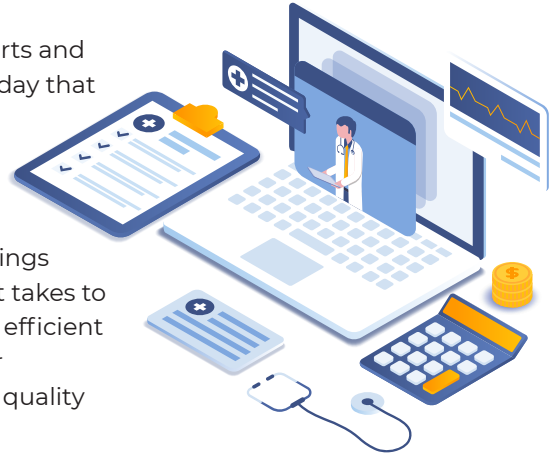

Workflow

Electronic approvals with attached documents (GL, AP, PO, etc.).

Dramatically reduce reconciliation time pre-approved transactions.

Push-button accruals – all invoices accounted for even prior to approval.

Monitoring of all authorizations and review processes.

Reduced audit preparation – no paper invoices to pull from filing cabinets.

Realized discount advantages with faster vendor payments.

Easy Task Tracking and Execution

The days of paper to-do lists are behind you with automated alerts and follow-ups. Reconciliation exceptions produce push alerts each day that can be easily checked off as your team works through them. Cash balances, vouches on hold and other items that require follow-up can be easily marked as such, keeping staff on track.

The simplified workflow that Multiview creates helps prevent things from being overlooked or forgotten. It also speeds up the time it takes to address these common issues, ensuring a more productive and efficient team overall. That results in even more resource savings for your practice, allowing you to invest more into what matters, like the quality of patient care.

Business Intelligence

Integrated reporting, dashboards, pivots and graphs.

Department leadership report access Ease of analyzing – drill back to the source functionality for easy reconciliation and analysis.

Fully integrated consolidation reporting.

Budgeting and Forecasting

Visibility of budget processing status – realtime inquiry screens.

Fully integrated – no redundant structure required.

Audited change management.

Full drillback functionality from the reporting tool to the budget workbook details.

Better Bank and Cash Management

Multiview ensures accurate bank management and an effective cash management solution. Daily automated check clearing in addition to reduction at month-end for bank reconciliation means that your team will spend less time balancing the books.

You can also collect detailed statistics from all of your revenue sources and use that data with integrated reports, dashboards, pivots and graphs. The level of insight and control that our healthcare ERP provides is simply unmatched and our team of industry professionals will show you how to make the most of it.
