

OUTCOMES THAT MATTER TO RURAL HOSPITAL CFOs

Client Success with TruBridge + Multiview

+

More than 50 TruBridge clients have chosen Multiview's ERP solution. Whether you're trying to get faster, more accurate financial insights, reduce manual workloads, or give department leaders the data they need to make informed decisions, the TruBridge + Multiview partnership is delivering results.

Built to Solve the Right Problems for Rural Hospitals

Unlike general-purpose ERP platforms, Multiview understands the unique needs of healthcare finance — especially in smaller acute care hospitals. And with a seamless connection to TruBridge, you get the clinical and financial data working together — without messy integrations or disjointed workflows.

"Having everything connected within TruBridge and Multiview—without needing to juggle multiple platforms—is a huge advantage. It's going to streamline my workflow and make everything feel more seamless."

Kristen Nelson

Business Office Manager, Niobrara Valley Hospital

"Multiview's partnership with TruBridge was a key factor for us. Knowing that they had already successfully implemented hospitals like ours gave us confidence in making the decision."

Diane Moore

CFO, Mitchell County Hospital

More Confidence in Your Numbers, More Time for Strategy

For rural hospital CFOs managing complex responsibilities with limited resources, Multiview brings welcome relief when integrated with TruBridge for a complete picture of operational and financial performance.

"At my previous hospital, Multiview cut my month-end close from six days to just 1.5 days. I'm so excited to get to an efficient process again by bringing Multiview to Chambers."

Kimberly Cooper

CFO, Chambers County Hospital

"Having timely and reliable data is incredibly important for our finance team. With Multiview, we've seen a noticeable improvement in how we manage and access that information."

Diane Moore

CFO, Mitchell County Hospital

Time-Saving Automation Where It Matters Most

Whether it's invoice approvals, depreciation tracking, or reconciliations, Multiview helps eliminate repetitive manual tasks—freeing up your team to focus on higher-value work.

"Our AP lead is beside herself with excitement. Now, invoices can be reviewed and managed electronically instead of relying on a paper trail. The efficiency gains are huge."

Diane Moore

CFO, Mitchell County Hospital

"Before Multiview, I had to manually track 84 prepaid amortizations in spreadsheets every month—it was a nightmare. With Multiview, the system handled it automatically."

Kimberly Cooper

CFO, Chambers County Hospital

Better Insights for Department Managers

Multiview makes financial transparency possible across the organization.

"It's impossible to hold a manager accountable for their budget if they never get to see anything. With Multiview, they'll have full transparency into revenue and expenses."

Kimberly Cooper

CFO, Chambers County Hospital

"Our managers and directors can now easily see what's happening in their departments—whether it's dietary spending, housekeeping supplies, or other operational costs. That level of visibility just wasn't possible before."

Diane Moore

CFO, Mitchell County Hospital

Exceptional Support During and After Implementation

ERP transitions can be daunting—especially for small teams. Multiview's in-house implementation and support team acts as an extension of your own, and we'll guide you every step of the way.

"I'd give it a 10! The transition has been smooth, and the team has been excellent—responsive, communicative, and supportive every step of the way."

Kristen Nelson

Business Office Manager, Niobrara Valley Hospital

"The Multiview team has been amazing. We have a small department, and they provided the extra time and help we needed to get everything right."

Diane Moore

CFO, Mitchell County Hospital

Backed by Healthcare Expertise

Multiview isn't just another accounting platform. It's built by a team that understands how hospitals operate—and what makes rural providers unique.

"One of the reasons we chose Multiview was their deep experience in healthcare finance. Many ERP solutions are great accounting packages, but they don't understand hospital reporting requirements like Multiview does."

Diane Moore

CFO, Mitchell County Hospital

"Multiview gives managers and finance teams the tools they need to be successful—and it makes my job infinitely easier."

Kimberly Cooper

CFO, Chambers County Hospital

Advice From Your Peers

"If you're looking at Multiview, ask yourself:
What pain points do you have today?
You might not realize just how much time
and frustration it could save you."

Kimberly Cooper

CFO, Chambers County Hospital

"There is life on the other side of the
implementation! If you're hesitant,
just ask for help. The transition has been
worth it for the improvements we've seen."

Diane Moore

CFO, Mitchell County Hospital
