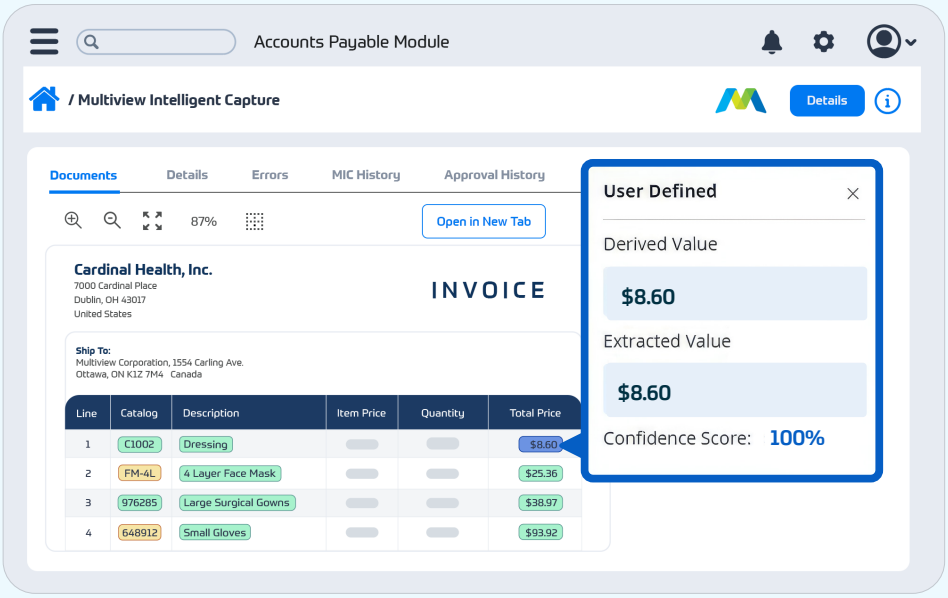
# Multiview Intellient Capture

AI-enabled document processing for healthcare finance.



### Intelligent Data Extraction

Capture vendor and financial details from invoices and handwritten documents.

### Document Splitting

Upload multiple invoices and process them as individual transactions.

### Confidence Score & Review Workflow

Set your own accuracy thresholds for most fields, including User Defined Fields, and initiate human review when you need it.

### AP to PO Matching

Match invoices to the correct PO in Multiview by linking the PO number, Vendor ID, product description, quantity, price, and more.

### Detail Line Capture

Record descriptions and prices directly from the invoice lines.

## Results are just around the corner
